

Occupational Therapy Market is estimated to be grow with a significant CAGR during the forecast period

Occupational therapy (OT) is a healthcare profession which has application of assessment and intervention to help individuals, groups, and communities develop, recover, or maintain meaningful activities or occupations. Occupational therapists and occupational therapy assistants practice this allied health profession (OTA). Occupational therapists (OTs) frequently work with persons who have mental health issues, disabilities, injuries, or impairments. An occupational therapist is someone who "helps people across their lifespan participate in the things they want and need to achieve via the therapeutic utilization of ordinary activities," according to the American Occupational Therapy Association (occupations).

The report " Global Occupational Therapy Market, By Product (Cloud- based, On- Premises), By Disease (Mental Disorders, Physical Disorders), By Application (Psychological Disorders, Hospital, Others) and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Market Trends, Analysis, and Forecast till 2030"

Key Highlights:

- In November 2021, Positive Action, Inc. ("PAI"), the leading education and Technology Company for evidence-based social and emotional learning (SEL) programs, has partnered with Presence Learning, Inc., the leading provider of live online therapy tools and special education related services for K-12 schools, to form a distribution partnership. Speech language treatment, occupational therapy, behavioral and mental health therapy, and assessments are among the special education services provided.

Analyst View:

The market is likely to develop as the number of accident rises. The market is boosted by factors such as an ageing population, rising disease and disabilities, rising healthcare spending, and technological advancement and growth in the healthcare industry. In the five years leading up to 2018, the Occupational Therapists business profited from increased demand for industry services as well as a rise in financial accessibility for patients due to increased disposable income and a number of favorable healthcare legislation. Furthermore, as a result of an ageing population and the rising frequency of autism spectrum disorder, demand for facilitative occupational therapy (OT) services has increased (ASDs).
