

## **Catalyst Handling Services Market is estimated to be US\$ 787.49 million by 2030 with a CAGR of 4.50% during the forecast period**

Catalyst Handling Services Market accounted for US\$ 510.34 million in 2020 and is estimated to be US\$ 787.49 million by 2030 and is anticipated to register a CAGR of 4.50%. Catalyst handling services include catalytic transportation and handling, catalyst loading and unloading, catalyst screening, storage, and segregation, spent catalyst management, and more. Rural-to-urban migration has exploded in recent years, resulting in greater urbanisation. Growing urbanisation and a burgeoning middle class have resulted in high demand for a variety of materials and products. Increasing manufacturing capacity is critical for ensuring a continuous and uninterrupted supply of commodities. This feature has resulted in greater industrialization, which has boosted the catalyst handling services market's growth prospects. End-use industries such as petroleum refining, chemicals and fertilisers, petrochemical, and other heavy industrial processing sectors employ catalyst handling services.

The report " Global Catalyst Handling Services Market, By Type (Catalyst Loading/Unloading, Catalyst Screening, Segregation & Storage, Catalyst Transport & Handling, Spent Catalyst Handling, and Others), By End-User Industry (Petroleum Refining, Chemical & Fertilizer, Petrochemical, and Others) and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Market Trends, Analysis, and Forecast till 2030"

### **Key Highlights:**

- CR Asia began employing a hydraulic drum tipper in November 2020, which can safely and efficiently convey goods into loading hoppers or bulk bins by lifting up to four drums of varied weights and sizes. When compared to traditional techniques of unloading drums, this invention has boosted safety and reduced time by 20%. This innovation reduces the use of forklifts and cranes while also reducing manual handling, operating at height, and tiredness.
- CR Asia and Batrek (part of Veolia) in Switzerland signed a group-wide collaboration agreement in April 2020 for the disposal of mercury-containing wastes, particularly wasted mercury removal adsorbents and mercury-laden sludge.

### **Analyst View:**

Plastics, packaging materials, textiles, digital devices, medical equipment, detergents, fertilisers, tyres, and other items are all made with petrochemical chemicals. The use of petrochemicals in the production of many components of the modern energy system, such as solar panels, wind turbine blades, batteries, building thermal insulation, and electric vehicle parts, is also predicted to boost demand. A massive amount of plastic garbage has been noticed around the world, which has a significant environmental impact and may stymie demand for petrochemical products. However, rapid increases in plastic waste recycling and a reduction in the use of single-use plastics for purposes other than critical non-substitutable functions are predicted to lessen the environmental effect of plastics and, as a result, maintain petrochemical product use.

### **Key Market Insights from the report:**

Global Catalyst Handling Services Market accounted for US\$ 510.34 million in 2020 and is estimated to be US\$ 787.49 million by 2030 and is anticipated to register a CAGR of 4.50%. The Global Catalyst Handling Services Market is segmented based on type, end-user and region.

- Based on Type, Global Catalyst Handling Services Market is segmented into Catalyst Loading/Unloading, Catalyst Screening, Segregation & Storage, Catalyst Transport & Handling, Spent Catalyst Handling, and Others.
- Based on End-User, Global Catalyst Handling Services Market is segmented into Petroleum Refining, Chemical & Fertilizer, Petrochemical, and Others.
- By Region, the Global Catalyst Handling Services Market is segmented into North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

### **Competitive Landscape & their strategies of Global Catalyst Handling Services Market:**

The key players in the catalyst handling services market include Mourik (Netherlands), Anabeeb (Saudi Arabia), Dickinson Group of Companies (South Africa), CR Asia (Thailand), Catalyst Handling Resources (US), Technivac (UK), Cat Tech (UK), Buchen-ics (Germany), and Kanooz Industrial Services (Saudi Arabia). These players have established a strong foothold in the market by adopting strategies, such as new technology development and agreements.

The market provides detailed information regarding the industrial base, productivity, strengths, manufacturers, and recent trends which will help companies enlarge the businesses and promote financial growth. Furthermore, the report exhibits dynamic factors including segments, sub-segments, regional marketplaces, competition, dominant key players, and market forecasts. In addition, the market includes recent collaborations, mergers, acquisitions, and partnerships along with regulatory frameworks across different regions impacting the market trajectory. Recent technological advances and innovations influencing the global market are included in the report.
