

Commercial Cooking Equipment Market is estimated to be US\$ 143.03 billion by 2030 with a CAGR of 6.1% during the forecast period

Commercial Cooking Equipment Market accounted for US\$ 79.45 billion in 2020 and is estimated to be US\$ 143.03 billion by 2030 and is anticipated to register a CAGR of 6.1%. Commercial cooking refers to a business or organisation that makes food for public consumption. Fast food restaurants that require quick service for items like burgers, pizzas, and sandwiches, as well as short order restaurants where table service is not required but the kitchen and dining rooms are structured for cooking and quick service, use commercial cooking. Commercial culinary equipment is used here. Commercial cooking equipment is utilised in restaurants that place a higher value on the dining experience and ambience, as well as in schools and hospitals that use a lot of cooking equipment such ovens and deep fryers.

The report "Global Commercial Cooking Equipment Market, By Equipment Type (Fryers, Ovens, Cookers, Ranges, Kettles, Steamers, and Others), By End Users (Full Service Restaurant & Hotels, Quick services, and Catering Services) and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Trends, Analysis and Forecast till 2029"

Key Highlights:

- Components Town, a commercial foodservice equipment distributor based in the United States, has acquired PartsXpress, a provider of foodservice and commercial appliance parts for Smart Care Equipment Solutions. Components Town will become Smart Care Equipment Solutions' primary source of genuine OEM parts as a result of this purchase.

Analyst View:

Changes in the youth population's lifestyles, such as a shift toward a low-calorie, healthy diet, are predicted to have a favourable impact on demand for nutritional food chains and, as a result, commercial kitchen equipment. Furthermore, increased consumer expenditure on tourism and the hospitality industry encourages restaurant operators to modernise their infrastructure and provide better services. As a result, rising demand for the installation of improved kitchen equipment in commercial areas is likely to boost market growth. The foodservice industry's increasing usage of smart kitchen equipment is predicted to stimulate demand for commercial kitchen appliances. These smart commercial kitchen appliances are fitted with sensors and advanced networking technologies that allow them to link to portable devices such as smartphones and tablets.
