

Ion Chromatography Market worth US\$ 2.2 Billion 2018 with a CAGR of 5.8%

Increasing use of [ion-exchange chromatography](#) for purification, along with the growing demand for monoclonal antibodies is the primary factor driving the growth of the global ion chromatography market. The global market is currently growing owing to the increasing adoption of ion-exchange techniques in the food, beverage, and water industries. To check the quality, safety, or content, ion chromatography is widely being used in various industries. Moreover, the ion-exchange technique is also being used to check the amount or presence of ingredients in a sample. Nevertheless, an increase in environmental testing leads to create lucrative growth opportunities for global market growth.

The report "**Global Ion Chromatography Market, By Technology (Ion-exchange Chromatography, Ion-exclusion Chromatography, and Ion-pair Chromatography), By Application (Environmental Testing, Pharmaceutical Industry, Food Industry, Chemicals Industry, and Others), and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Trends, Analysis and Forecast till 2030.**"

Key Highlights:

- In July 2018, Shimadzu Corporation partnered with Protein Metrics, to offer advanced solutions for biotherapeutic protein analysis.
- In March 2018, Thermo Fisher Scientific acquired IntegenX, a provider of leading rapid DNA technology for human identification

Key Market Insights from the report:

The global **ion chromatography** market accounted for US\$ 2.2 billion in 2018 and is projected to register a moderate CAGR over the forecast period. The market report has been segmented based on technology, application, and region.

- By technology, ion-exchange chromatography accounts for the highest share and was valued at US\$ 1445.91 million in 2017. The Ion-exchange Chromatography market is accounted to be US\$ 1521.79 million in 2018 and is projected to reach US\$ 2018.11 million by 2023, registering a CAGR of 5.81% over the forecast period.
- By application, the environmental testing market holds the highest market share and was valued at US\$ 635.08 million in 2017. The market is accounted to be US\$ 668.02 million in 2018 and is anticipated to reach US\$ 883.29 million by the year 2023, witnessing a CAGR of 5.75% during the forecast period.
- By region, North America holds the highest market share in the global ion chromatography market and was valued at US\$ 821.75 million in 2017. The market is accounted to be US\$ 864.39 million in 2018 and is projected to reach US\$ 1143.12 million by the year 2023, witnessing a CAGR of 5.75% over the forecast period.
