

Time Temperature Indicator Labels Market, is estimated to be US\$ 1590.0 million by 2030 with a CAGR of 6.10% during the forecast period

Time temperature indicator labels are widely used to keep track of the temperature of perishable products during shipping and transportation to minimise spoilage. Cold chain transport businesses and other end customers in the food and pharmaceutical industries utilise these non-reversible temperature labels. Their use aids in the control of high temperatures that includes commodities like medications and food may be subjected to during transit. Labels with time temperature indicators lessen the likelihood of costly spoilage and its negative influence on a country's economy. The technology involves with time temperature indicator labels is of varying degrees of sophistication. The evolution of the time temperature indicator labels market is being driven by rising industry efforts to launch low-cost, easy-to-use labels for the food industry. The global time temperature indicator labels market is being driven by increased trade activity related to perishable item exports and imports. The market is also being pushed by the increasing use of these labels in clinical supplies. The shipment of seafood and wine has been boosted by increased demand in various sections of developing countries. The need for time temperature indicator labels has increased as a result of this trend, which has increased the requirement to protect them from spoiling due to temperature abuse. In recent years, the global market's revenues have been boosted by the increasing adoption of low-cost temperature monitoring technologies. The market is benefiting from increased demand for fresh produce in a number of developing and developed countries.

Region Analysis:

Europe dominates the market for time temperature indicator labels due to rigorous laws on food safety and quality, as well as a surge in awareness of time temperature label technologies in the region. East Asia is predicted to grow rapidly during forecast period due to developing countries like China, increased investments in regional pharmaceutical and food sectors, and the presence of enhanced supply and distribution network infrastructure in the region.

Key Highlights:

- Timestrip announced the introduction of new time temperature indicator labels for enabling applications for frozen Covid-19 vaccine packaging in November 2020. The goal was to find vaccinations that are susceptible to temperature fluctuations.
- Fresh & Easy in Torrance, California has partnered with Bizerba SE & Co. KG to provide Fresh Meter time temperature indicators for the latter's seafood goods.
- To develop the Oli-Tec (Open Life Indicator Technology) time temperature indicator (TTI) system, Open Life Packaging Ltd. teamed together with Dynamic Input. The label's function is to activate a fail-safe mechanism in the event of an internal failure.

Key Market Insights from the report:

Global Time Temperature Indicators Labels Market accounted for US\$ 851.2 million in 2020 and is estimated to be US\$ 1590.0 million by 2030 and is anticipated to register a CAGR of 6.10%. The global time temperature indicator labels market has been segmented on the basis of product type, label information, end user, and region.

- Based on Product Type, Global Time Temperature Indicators Labels Market is segmented into color-based and barcode-based.
- Based on Label Information, Global Time Temperature Indicators Labels Market is segmented into Critical Temperature Indicator (CTI), Critical Time Temperature Indicators (CTTI), and (TTI).
- Based on End-User, Global Time Temperature Indicators Labels Market is segmented into food and beverages, pharmaceutical, and chemicals and fertilizers.
- By Region, the Global Time Temperature Indicators Labels Market is segmented into North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

Competitive Landscape & their strategies of Global Time Temperature Indicators Labels Market:

Key players operating in the global time temperature indicator labels market includes 3M Co., CCL Industries Inc., Temptime Corporation, Thin Film Electronics Inc., Bizerba SE & Co. KG, Deltatrak Inc., Biosynergy, Inc., Freshpoint Quality Assurance Ltd., Insignia Technologies Ltd., and La-Co Industries Inc.
