

Peptide Based Metabolic Disorders Therapeutics Market is estimated to be US\$ 71.85 billion by 2030 with a CAGR of 7.2% during the forecast period

In conjunction with medical research efforts, there are multiple ongoing research activities and technical breakthroughs that focus on the treatment of various disorders. Peptide therapies are used to treat a variety of conditions, including metabolic problems. Peptides have good stability, effectiveness, and safety, and they are also tiny in size, making them easy to synchronise. These benefits are propelling the global peptide-based metabolic disorders therapies market forward. Factors such as technological developments and greater investment in healthcare, as well as the outstanding economic growth of biotech and pharmaceutical businesses, have aided in the use of peptides for the treatment of metabolic diseases.

The report "**Global [Peptide Based Metabolic Disorders Therapeutics Market](https://www.prophecymarketinsights.com/market_insight/Global-Peptide-Based-Metabolic-Disorders-Therapeutics-Market-4835), By Drug (Liraglutide, Exenatide and Others), By Distribution Channel (Hospital Pharmacies, Retail Pharmacies and Online Pharmacies), and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Market Trends, Analysis, and Forecast till 2030"**

Key Highlights:

- In Dec 2021, Adocia, a clinical-stage biopharmaceutical business specialising in peptide and protein formulations for diabetes and other metabolic illnesses, announced today the submission of a patent for peptide delivery technology.

Analyst View:

The rise in biotech and pharmaceutical firms dealing with peptides, as well as increased investment in the healthcare industry and research. The rising prevalence of metabolic diseases has necessitated the development of innovative peptide-based treatments, which has boosted the use of peptide therapeutics in the treatment of metabolic disorders, boosting the global peptide-based metabolic disorders therapeutics market.

Key Market Insights from the report:

The Global Peptide Based Metabolic Disorders Therapeutics Market is segmented based on drug, distribution channel and region.

- Based on Drug, Global Peptide Based Metabolic Disorders Therapeutics Market is segmented into Liraglutide, Exenatide and Others.
- Based on Distribution Channel, Global Peptide Based Metabolic Disorders Therapeutics Market is segmented into Hospital Pharmacies, Retail Pharmacies and Online Pharmacies.

- By Region, the Global Peptide Based Metabolic Disorders Therapeutics Market is segmented into North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

Competitive Landscape & their strategies of Global Peptide Based Metabolic Disorders Therapeutics Market:

The key players operating in the peptide based metabolic disorders therapeutics market are AstraZeneca PLC, Teva Pharmaceutical Industries Ltd., PolyPeptide Group, Novo Nordisk A/S, Merck & Co., Inc., Ipsen S.A, Eli Lilly Company, CordenPharma International and Bachem Holding AG.

The market provides detailed information regarding the industrial base, productivity, strengths, manufacturers, and recent trends which will help companies enlarge the businesses and promote financial growth. Furthermore, the report exhibits dynamic factors including segments, sub-segments, regional marketplaces, competition, dominant key players, and market forecasts. In addition, the market includes recent collaborations, mergers, acquisitions, and partnerships along with regulatory frameworks across different regions impacting the market trajectory. Recent technological advances and innovations influencing the global market are included in the report.
